

Air Flight status

Air Flight status is an ultra-fast and efficient solution for airlines that want to provide their clients with last minute information of their flights.

Backoffice

- Some examples of information that can be provided:
- Status (Scheduled, Cancelled, Delayed, In air, etc.).
 - Diversion status and diversion route information.
 - Departure and arrival gate and terminal.
 - Baggage claim assignment.

The solution is offered through an easy to implement set of APIs. We can also provide flight on time statistics and dashboards when airlines require them as scheduled.

DEPARTURE	DELAYED		ARRIVAL	SCHEDULED	
AUA	11:50 11:41	02/08/2023	BOG	13:20	
Aruba – Aeropuerto Internacional Reina Beatrix			Bogotá – El Dorado International Airport		
TERMINAL	GATE	CHECK-IN	TERMINAL	GATE	BAGGAGE
2	B62 B53	189	1	A24	17
